

## Control Length and Height for 500 Watt Xenon Remote Lever-Controlled Searchlight

- **Dimension “X”...** is the control length measured from the searchlight mounting surface (i.e. pilothouse rooftop, guardhouse rooftop, etc), to the centerline of the lever control handle. The standard length is 22-inches (559mm), however it can be made any length to satisfy your needs. Consult factory for the exact custom length you desire.
- **Dimension “Y”...** is the height measured from the searchlight mounting surface to the center of the searchlight head. The standard base searchlight (Model X9396LG-RF) has Y-Dimension of 23.19-inches (589mm) and the searchlight model with a Taller Pedestal (Model X4785LG-RF) has Y-Dimension of 52-inches (1321mm). The Searchlight Height can be any custom height. Consult Factory for the exact custom height you desire.
